

NISHTHA ARORA | RESUME

- » **Status:** B.Tech Computer Science Engineering (AI/ML) Student
- » **Languages:** Python, SQL, C++, Java
- » **Backend:** FastAPI, REST APIs, PostgreSQL, Supabase
- » **AI/ML:** LLMs, RAG, LangChain, Scikit-learn, TensorFlow
- » **Databases:** PostgreSQL, Supabase, DuckDB
- » **Tools:** Git, GitHub, Docker, VS Code, Jupyter Notebook
- » **Coursework:** DBMS, Operating Systems, Computer Networks, Data Structures, Artificial Intelligence

Summary

Backend Developer and Generative AI enthusiast pursuing B.Tech in Computer Science (AI/ML) with hands-on experience building scalable backend applications and AI-powered solutions. Skilled in Python, FastAPI, REST APIs, PostgreSQL, Supabase, Docker, and Large Language Models (LLMs). Experienced in developing AI systems using Retrieval-Augmented Generation (RAG), embeddings, and vector search. Passionate about designing efficient backend architectures and deploying production-ready AI applications.

Experience

06/2026 Present	- Gen AI Developer Intern	TantranZm Technologies Pvt. Ltd.
	» Developing AI-powered recruitment platform (Work360) using Python and FastAPI » Building backend REST APIs integrated with PostgreSQL and Supabase » Working on candidate ranking using LLMs, embeddings, and Retrieval-Augmented Generation (RAG) » Implemented resume parsing, AI-generated summaries, and semantic search pipelines » Debugging backend APIs, database workflows, authentication, and business logic » Collaborating with frontend and backend teams using Git and Agile development practices	
03/2026- 06/2026	- Data Analytics Intern	CODTECH IT SOLUTION
	» Completed an 8-week virtual internship focused on Data Analytics and Visualization » Worked on projects involving Python, SQL, Excel, and Data Visualization » Learned data cleaning, preprocessing, and exploratory data analysis techniques » Built analytical solutions and dashboards for business insights	
07/2025 -12/2025	- Data Analytics & Machine Learning Intern	Infosys Springboard Learning
	» Implemented Decision Tree models achieving 90% accuracy for classification tasks » Analyzed datasets containing 10,000+ records using Python (Pandas, NumPy) and SQL » Built 3+ Power BI dashboards for KPI tracking and performance monitoring » Delivered actionable insights to support data-driven business decisions	

Projects		
2023	AI Candidate Ranking System	FastAPI • LLM • Supabase
	» Developed an AI-powered recruitment platform for automated candidate screening » Built backend services using FastAPI and PostgreSQL » Implemented resume parsing, embeddings, semantic search, and AI-generated summaries » Integrated Supabase authentication and database services	
	AI for Agriculture	Major Project
	» Developed an AI-powered assistant for farmers » Implemented crop disease detection using computer vision » Integrated multilingual chatbot, satellite imagery analysis, weather forecasting, and market price prediction	
	Autonomous Driving using Deep Q-Learning	ICAIA Conference Research Paper
	» Studied Deep Q-Learning models and analyzed attack and defense mechanisms » Performed research on reinforcement learning techniques in autonomous driving	
	Virtual Keyboard using OpenCV	Computer Vision Project
	» Built a gesture-based virtual keyboard using OpenCV and Python » Implemented real-time hand tracking and gesture recognition	
	E-commerce Sales Dashboard	Data Analytics Project
	» Developed interactive dashboard to track revenue, profit, and sales trends » Identified top-performing products and regional performance insights	
2022	MovieSphere – Movie Recommendation System	Machine Learning Project
	» Developed a Netflix-like recommendation system using collaborative and content-based filtering » Built recommendation engine using Python, Pandas, and Scikit-learn	
	Interactive Netflix Dashboard	Tableau Data Analytics Project
	» Designed an interactive Tableau dashboard to analyze Netflix movies and TV shows » Visualized genre distribution, ratings, release trends, and country-wise content insights » Used charts, maps, and KPI cards to present data-driven storytelling effectively	
	Personal Portfolio Website	Frontend Development Project
» Developed a responsive personal portfolio website using modern web technologies » Showcased projects, technical skills, certifications, and social links interactively » Designed clean UI with animations and professional developer-focused layout		
Education		
2022 - 2026	B.Tech Computer Science Engineering (AI/ML)	Chandigarh University, India
	» CGPA: 7.6	
2022	High School	Holy Child Public School, Faridabad

	» Percentage: 77.4%	
2020	Secondary School	Holy Child Public School, Faridabad
	» Percentage: 85.8%	

»» Certifications & Achievements

- » Oracle Certified Professional – Generative AI (OCI 2024)
- » AWS Academy Graduate – Cloud Foundations
- » Microsoft – Generative AI for Data Analysis (Coursera)
- » IBM – Python for Data Science & AI
- » Deloitte Australia – Data Analytics Job Simulation (Forage)
- » Winner – Techathon 3.0
- » Smart India Hackathon (SIH) Nominee
